SUMMARY

Hello, I'm Ellie and I love software engineering! From my first Steam bot that traded video game items to the social stock and crypto paper trading app I am working in a team on right now, I've learned a great deal about how to follow a scrum framework, work in a team, and stick to a project when it gets rough. In my spare time I go on hikes, cycling, and the occasional 10 kilometer run.

EDUCATION

Sonoma State University – *Computer Science Undergraduate*

August 2018 – May 2023

BS – Computer Science Program, expected May 2023

SKILLS

Computer Assembly and Maintenance, Linux Command Line Interface, Secure Shell, Windows OS, Mac OS, Linux OS, Python, C++, SQL, MariaDB, Javascript, nodeJS, reactJS, Object Oriented Programming, Amazon Web Services, Shell Scripting, Git, Jira, Agile

EXPERIENCE

Sonoma State University – *Web Administrator/Culinary Assistant*

June 2022 – Present

- Designing, Developing, and Hosting a new employee training website for Culinary Services while working as a culinary assistant
- Prepared said training website for migration to AWS

Sonoma State University – *Resident Advisor*

August 2021 – May 2022

- Designed, and hosted static web pages over an AWS EC2 instance for programs and events using wordpress
- Assisted in the selection and evaluation of incoming RAs

Koret Research Program, Sonoma State University – *Researcher*

Spring 2021

- Gathered and analyzed data on why womxn leave engineering at a higher rate than mxn
- Hosted a panel discussion of professionals, students, and alumnus resulting in increased awareness of the gender gap in Engineering

Society of Women Engineers, Sonoma State University – *President*

Fall 2019 – Spring 2021

- Planned and ran a Mixed Reality Unity Game Engine basics workshop resulting in participants creating their own XR applications
